Editorial

Capturing rains

India needs all whether insurance agency and it vagaries of global climate

➔ **About the editorial**

The editorial is about rain in Monsoon season .

Monsoon in India is count to be between June and September . For the first time since 2018 rain in Monsoon has been less than normal . India received 82 CM rain which is 6% lower than 89 CM that is considered ' normal ' .

However India saw very unexpected rain in some parts like in July unexceptionally high rain in Chandigarh , Haryana and Himachal Pradesh saw unexpectedly high rain in that caused landslides .Heavy rain in Himachal Pradesh in August saw infrastructural and lives losses . Unexpected and heavy rain in this part of country was because of western Disturbance . Regions of Deccan plateau mainly Karnataka , Tamil Nadu, Maharashtra and Chhattisgarh witnessed high deficiency in Rainfall .

This year was expected to be El Nino year , it s effect on India was supposed to be lower rain . But India Ocean Dipole another phenomenon was supposed to counter it . IMD has forecasted ' normal to evolve normal rain ' for northeastern monsoon that is between October and December . Northeastern monsoon mainly rains in TamilNadu and Kerala

Editorial
