#### **➡** Will SLIM (Smart Lander for Investigating Moon)

JApan's SLIM spacecraft entered lunar orbit on December 25, it aims landing on January 19, Potentially making Japan the fifth country to land on moon. India became fourth country to land after Russia, US and China.

SLIM weighs 590 kg at launch which is significantly lighter than (  $3900 \ kg$  ) , emphasising fuel efficiency and carrying fewer instruments .

SLIM will land on Moon's Shioli crater , It will eject SELENE orbiter at height of 100 m , and after that it will eject Rover and Lander surface analysis .

SLIM's success or failure will inform Japan's collaboration with India's LUPEX mission, which will explore Moon's South pole region.

LUPEX (Lunar Polar Exploration Mission) is planned for 2026.
