This is the biggest strike on Russian territory in recent times

## SCIENCE

### Mosquitofish , used to fight mosquitoes has become invasive in India

#### ➔ Why in news ?

In the last few months various govt and NGOs in Andhra Pradesh , Odisha and Punjab , released mosquito fish in local water bodies to prevent the spread of mosquito menace , that locals have complained for , In Visakhapatnam alone six lakh mosquitofish was released .

Due to change in climate of the world the mosquito borne diseases is increasing . Today these diseases prevail in more than 150 countries worldwide , affecting more than 500 million people .

#### Mosquitofish , its drawbacks : IAS ACADEMY

Mosquitofish is a species of fish Gombusia .

Mosquito Fish eats Misquito's Larvae . It was first introduced by the USA in 1960 , soon it spread all over the world .

Mosquitofish became an alternative to chemicals or pesticides , which had dire effect on human health .

But on the other side , these fishes are notorious for detrimental ecological impact , including dispatching and preying on Local Fauna leading to the extinction of local fish .

#### Introduction in India

In India in 2018 , Gambusia Affinis and Gambusia Holbrooki was declared as invasive alien species due to ecological damage caused by it .

India should introduce some local solution other than Gombusia

#### ➔ From Voice to action , Can Rabbit R1 disrupt smartphone market

Rabbit Inc has included AI in its device . One can even book tickets , plan vacations by simply giving voice instruction . This is not possible even with tools such as Alexa , Google Assistant etc .

Rabbit R1 can be game changer in coming times
