This year alone 5 samples has been collected from Pakistan and 6 from Afghanistan . In 2023 the number of samples collected were around 125 in both the countries .

WHO announced polio eradication from Africa . Polio cases after that were cornered to rural pockets of Afghanistan and Pakistan . Where there is still hesitancy in taking Vaccines . Also there is risk of spreading the diseases as the citizens of the two countries often migrate. WHO had a programme to make world free of Polio by 2024 . But the recent spike in cases has shown that the target is unlikely to be achieved .
